

FarmView 2.0

Even from a distance –
Status analysis and remote maintenance for your Mlone

GEA Farm Services

So far yet so close –

Status analysis and remote maintenance for your Mlone

With the new FarmView 2.0 monitoring service tool, we offer innovative software which provides regular, real-time status monitoring. Now you can monitor your Mlone with even greater flexibility – anywhere and anytime – using mobile end devices. Our integrated service calendar and logbook provide you with information about your upcoming service appointments and the maintenance work carried out. Ensure that you benefit from the advantages of FarmView by signing a service contract at your specialist centre.

Status analysis – Would you like to have the performance data for your Mlone available at all times?

Milk yield, milking duration or box utilisation: Take advantage of regular analysis and an intelligent warning system. FarmView displays your current system data and also shows trends thanks to the constant data exchange between the milking system and FarmView.

FarmView 2.0: Increase the transparency of your Mlone through up-to-date analysis!

Data backups – Do you want even greater data security?

Daily data backups are carried out in addition to the constant data exchange. As a result, FarmView keeps your data twice as safe and accessible even when an emergency occurs. The proven procedure utilising mGuard safeguards network security: This protects your milking system against unauthorised access and guarantees secure data transfer.

FarmView 2.0: Greater protection against data loss and unauthorised access!

Live view – Would you like to monitor your Mlone remotely via smartphone or tablet and in real-time?

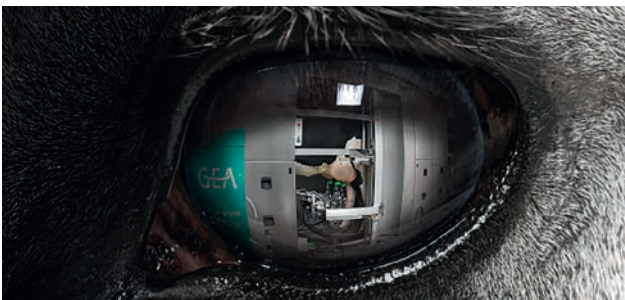

In the era of automation, in which a constant presence during the milking process is unnecessary, FarmView provides you with a comprehensive picture even from a distance: The live view lets you monitor the milking process and see which cows are currently being milked, which are overdue and also lets you see the system status.

FarmView 2.0: The live view allows you more flexible working times and locations.

DashBoard – Would you like to see all of the important information at a glance?

The new DashBoard lets you view your selected milking statistics, recent warnings and logbook entries along with your upcoming service appointments as soon as you access FarmView 2.0.

FarmView 2.0: The DashBoard rapidly provides you with information about the most important parameters.

Service – Would you like to stay informed about service activities on your robots?

Your service calendar always keeps you up-to-date so that you know when the last service was carried out and when the next one is due.

The service logbook allows you to check at any time which service in which activities were carried out and by whom. This serves to make the maintenance process transparent for you, as well.

FarmView 2.0: The service calendar and the logbook assist you with planning and monitoring your service schedule.

Remote maintenance – Would you like immediate and detailed help via remote maintenance for your M1one?

Preventive measures drastically reduce downtimes. However, should an “emergency” nevertheless occur, your FarmView Team consisting of worldwide experts will be glad to assist you: the data received will be analysed, a prognosis of the problem will be given and remote maintenance will be carried out where needed. Feel the benefit of greater system availability and quicker reaction times.

FarmView 2.0: Rapid problem-solving through remote maintenance supported by a global team of experts.

Advantages at a glance:

- Up-to-date status analysis can prevent emergencies and reduce downtimes
- Live view of the system mobile devices enables more flexible working on locations
- Cost savings and faster reaction times thanks to remote maintenance

- The service calendar and the logbook support the system maintenance
- Backups guarantee that your data is securely stored
- The DashBoard provides a rapid overview of the system status

We live our values.

Excellence • Passion • Integrity • Responsibility • GEA-versity
